

Seoyun Park

Data Analyst

Seoul, South Korea | seoyun.park@example.com

PROFILE

Data analyst with experience translating sales and operations questions into dashboards and repeatable reports. Comfortable with SQL and Python data workflows and early-stage product experimentation.

EXPERIENCE

Data Analyst | Leaf Commerce

2024 – Present

- Built six SQL dashboards and a weekly revenue report used by sales and operations teams.
- Automated CSV cleanup in Python and pandas, saving approximately four hours of reporting work each week.
- Documented shared metric definitions across two departments to reduce discrepancies in reporting.

SELECTED PROJECT

- Contributed data preparation and prompt testing to an internal FAQ chatbot hackathon prototype.

SKILLS

SQL · Python · pandas · BI dashboards · Requirements gathering · Data quality
