

Hyunwoo Lee

Backend Software Engineer

Seoul, South Korea | hyunwoo.lee@example.com

PROFILE

Backend engineer building production APIs and improving reliability for internal commerce systems. Experienced in Python services, incident response, code review, and incremental releases.

EXPERIENCE

Backend Engineer | Morae Market

2023 – Present

- Developed eight settlement APIs in Python and FastAPI and participated in peer reviews and production releases.
- Added retry logic and alerts for failed queue jobs, reducing manual reprocessing from 90 to 25 cases per month.
- Converted requests from the operations team into API changes shipped on a two-week cadence.

SELECTED PROJECT

- Prototyped semantic search over personal notes using embeddings and a lightweight Python API.

SKILLS

Python · FastAPI · PostgreSQL · Docker · CI/CD · Incident response · JavaScript fundamentals
