

Yujin Jung

Machine Learning Engineer

Seoul, South Korea | yujin.jung@example.com

PROFILE

ML engineer focused on search and summarization workflows. Builds data pipelines, model-serving APIs, and evaluation datasets that turn model quality into measurable engineering decisions.

EXPERIENCE

Machine Learning Engineer | Daon Pay

2022 – Present

- Built an embedding pipeline for customer-support document search and curated a 300-case retrieval evaluation set.
- Improved an internal support-summary pilot's evaluation pass rate from 71% to 84% by addressing factual errors and retrieval scope.
- Developed Python model-serving APIs and batch jobs for a 40-person internal pilot.

Data Engineer | Cent Data

2021 – 2022

- Maintained log-ingestion jobs and data-quality checks for analytics and ML use cases.

SKILLS

Python · FastAPI · SQL · Vector search · Model evaluation · Data pipelines · JavaScript fundamentals
