

Jihoon Han

Senior Full-Stack Engineer

Seoul, South Korea | jihoon.han@example.com

PROFILE

Full-stack engineer with seven years of experience designing, building, and operating B2B SaaS workflows. Works directly with customer engineering teams to scope integrations and sequence reliable releases.

EXPERIENCE

Senior Full-Stack Engineer | Bridgeflow

2021 – Present

- Designed and shipped a React, TypeScript, and FastAPI approval workflow to 18 enterprise customers.
- Aligned API and access-control requirements with customer engineers and migrated customers in stages without service interruption.
- Used product telemetry to reduce median approval completion time from 2.4 to 1.6 days.
- Integrated a generative-AI drafting API into the product's document workflow.

Software Engineer | Lineworks Lab

2019 – 2021

- Developed web interfaces and APIs, reviewed code, and supported production incident response.

SKILLS

Python · FastAPI · React · TypeScript · PostgreSQL · AWS · CI/CD · Observability
