

Suhyun Bae

Lead AI Deployment Engineer

Seoul, South Korea | suhyun.bae@example.com

PROFILE

Customer-facing engineer with nine years of experience leading complex AI deployments in regulated environments. Aligns customer engineering, security, and product teams while owning hands-on delivery and adoption metrics.

EXPERIENCE

Lead Deployment Engineer | Prism AI

2021 – Present

- Led five LLM deployments for banking and telecom customers, running up to three projects concurrently and adjusting scope to protect launch dates.
- Implemented Python orchestration and evaluation APIs plus React review tools with customer-specific access and audit requirements.
- Reached 480 weekly active users in the first 90 days of a support-search deployment; achieved 63% answer acceptance and 29% lower average handling time.
- Maintained a 900-case evaluation set covering correctness, citations, and refusal behavior; findings informed product prioritization for citation display.
- Introduced a read-only pilot when a security review delayed write access, preserving the agreed release window.

Full-Stack Engineer | Ssiat Software

2017 – 2021

- Built customer-facing applications and owned production incident and performance improvements.

SELECTED PROJECT

- Authored a deployment playbook that cut environment preparation from three weeks to two.

SKILLS

Python · TypeScript · React · PostgreSQL · Kubernetes · LLM evaluation · Observability
